Professional Experiences

Thales Alenia Space

Cannes | Internship 5 month
2023

Software developer

As a intern in the IVVQ department at Thales Alenia Space, I had the opportunity to develop a tool for synthesizing the testing of satellite parts. The software was developed using a mix of C++ and Python, compiled using Cmake and installed using an automated installation script. It uses a 'Service Locator' design pattern, open source libraries and creates a report each time it is used to give engineers visibility of its execution. I had the opportunity to train a team in the use of this software and to create full documentation.

Les Agences de Papa

Nice | Internship 6 month
2021

System & network

As an intern in the IT team, I had the opportunity to participate to the development of this service. I contributed to: the change of the internal Vlan of the company and the installation of firewalls. I delivered a hardware/software inventory, procedures and workflows for the company's CRM.
