Professional Experiences

Thales DMS
Valbonne | **Internship 6 month**
Front-end developper
2025

As an intern in the software engineering department of Thales Defence Mission Systems, I currently have the opportunity to develop a learning management system aimed at providing an introduction to the underwater world for newcomers and sonar operators.
I am currently refactoring the code and migrating the existing solution to ReactJS. Over the next few months, the goal will be to add various interactive modules on different sonar-related topics and potentially expand the site with a back-end component.

Tutor: Sébastien Deries
sebastien.deries@thalesgroup.com

Thales Alenia Space
Cannes | **Internship 5 month**
Software developper
2023

As a intern in the IVVQ department at Thales Alenia Space, I had the opportunity to develop a tool for synthesizing the testing of satellite parts. The software was developed using a mix of C++ and Python, compiled using Cmake and installed using an automated installation script. It uses a 'Service Locator' design pattern, open source libraries and creates a report each time it is used to give engineers visibility of its execution.
I had the opportunity to train a team in the use of this software and to create full documentation.

- Sports (Tennis, badminton)

- Hardware and software problems

- Travels

Environment

- Docker/Parallels
- Linux / MacOs Windows
- Github

Les Agences de Papa   Nice | **Internship 6 month**
System & network   2021

As an intern in the IT team, I had the opportunity to participate to the development of this service. I contributed to: the change of the internal Vlan of the company and the installation of firewalls.
I delivered a hardware/software inventory, procedures and workflows for the company's CRM.
